

Boost Your Team With I-REN Energy Fellows!

Want to bring additional support to your agency? Consider hosting an I-REN Energy Fellow! Fellows are fully paid through AmeriCorps and I-REN, and offer numerous benefits that can help your organization thrive.

Benefits

- **Fresh Perspectives:** Fellows are tech-savvy, and can help innovate and improve existing processes.
- **Support With Projects:** From research and event planning to data entry and analysis, Fellows can assist with ongoing projects and help fill in gaps within your organization.
- **Cost-Effective Resource:** There is absolutely **no cost** to host a Fellow, and it's one of the easiest ways to expand your organization's capabilities without risking budget overspending.

Details

I-REN Energy Fellows are college graduates and seasoned workers transitioning into a new career. They spend 11 months embedded in a government agency, municipality, or public sector agency, and can support a wide range of energy efficiency and sustainability projects year-round. In return, Fellows gain real-world experience and kick-start their energy careers. All I-REN Energy Fellows are fully paid through AmeriCorps and I-REN.

The energy sector is growing in the Inland Empire! Our Energy Fellows are preparing for exciting careers in these roles and more.

- Energy Auditor
